

vector< char >

vector< CContourWithData >

letrasEncontradas_

contornosEncontrados_

CDetectarTransiciones

```
graph BT; A[CDetectarTransiciones] -.-> B[vector< char >]; A -.-> C[vector< CContourWithData >];
```

The diagram illustrates the data flow from the `CDetectarTransiciones` class to two output containers. The class, represented by a grey box at the bottom, has two dashed purple arrows originating from it. The left arrow, labeled `letrasEncontradas_`, points to a white box containing `vector< char >`. The right arrow, labeled `contornosEncontrados_`, points to a white box containing `vector< CContourWithData >`.
